

As a citizen of the US and Resident of the state of Washington I urge you to keep Net Neutrality...Maintain it...DO NOT CHANGE anything. We must maintain it if we have any future as a nation with free speech. Restoring internet freedom act does not restore internet freedom to anyone...WE ALREADY HAVE internet freedom. This just gives internet service providers free reign to do whatever they want without any repercussions. Such as holding your website hostage unless you pay your ISP extra for a "fast lane". This can have terrible repercussions on the gaming industry that I am a part of. Letting the free market take care of the problem is a joke because ISPs already have a semi-monopoly. Most places in the country do not have access to more than ISP. So, please maintain Net Neutrality under title 2. Do not vote for the misleadingly named Restoring internet freedom act...IT DOES NOT RESTORE FREEDOM FOR ANYONE EXCEPT FOR THE ISPS TO DO WHATEVER THEY WANT WITH YOUR DATA, INTERNET ACCESS, GAMING, WEB SERVICES.
